How to Connect To AirSuccess on an Apple Computer

Prepared by Virginia State University Technology Services
Document Overview

Contained within this document are the step by step instructions for connecting to VSU's AirSuccess.

AirSuccess is one of three portals to VSU’s wireless network. It is for use by students, faculty and staff who are using personally owned equipment.

Step 1: Select **System Preferences** on your Menu Bar.

Step 2: Select **Network** from **System Preferences**.

Step 3: Select **Advanced** from the **Network** panel.

Step 4: Select **AirSuccess** within the **Preferred Networks**.
Step 5: Click on the TCP/IP Tab.

Step 6: Select Using DHCP from the Configure IPv4 dropdown box.

Step 7: Select Automatically from the Configure IPv6 dropdown box.

Step 8: Select the 802.1x tab.

Step 9: Enter your network User Name and Password.

Step 10: Verify that AirSuccess has been selected from the Wireless Network dropdown box.

Step 11: Click the checkbox for PEAP for Authentication.

Step 12: Select the Ethernet tab.

Step 13: Select Automatically from the Configure dropdown box.

Step 14: Select OK.
Step 15: Confirm that your **Status** Authenticated and that the **Network Name** is **AirSuccess**.
