How to Connect To
AirSuccess
Using Windows XP
Wireless Utility

Prepared by
Virginia State University
Technology Services
Step 1: On the bottom right tray, click on the monitor with the wireless signal to the right.

Step 2: Click on change advanced settings.

Step 3: Click on Connect under your list of Wireless Network

Step 4: Click Next on Wireless Networks
Step 5: Click one time on AirSuccess.

Step 6: Click on Properties button.

Step 6: On the Association tab, ensure that Network Authentication is set to WPA2 and Data Encryption is set to AES.

Step 7: Click on the Authentication Tab.
**Step 8:** From the **EAP type** select Protected EAP (PEAP)

**Step 9:** Ensure that the **Authenticate as computer when computer information is available** is checked.

**Step 10:** Click on the **Properties** button under **EAP type**.

**Step 11:** Ensure that the **Validate server certificate** is unchecked.

**Step 12:** Ensure that the **Enable Fast Reconnect** button is checked.

**Step 13:** Click on the **OK** button at the bottom.
Step 15: Click on the OK button at the bottom.

Step 12: Click OK on the bottom.
