**“Cut the Cord”**

**Wireless is Available**

**VSU residence halls are now equipped for wireless network access via “AirSuccess”**.

Technology Services has been busy installing wireless in residence halls this summer. Wireless access in the residence halls, along with other areas of the campus, will serve the full range of Wi-Fi electronic communications devices, such as iPads, iPhones, laptop computers, cell phones, and other products. This is a robust wireless network exploiting the latest technology standards that will not only enable us to deliver current technology, but also lays the foundation for us to provide future technologies as they emerge.

“AirSuccess” is a fully encrypted wireless network that utilizes your VSU network userid and password for authentication, this was done to help protect your personal information and comply with applicable security policies. Once you’ve registered to AirSuccess in one building you should be able to connect to it wherever it is available on campus.

**Getting started:**

- Before you can utilize AirSuccess, you must activate your network account via a lab computer within your residence hall or any other location on campus with an open computer lab. The process is quite simple; at the computer login prompt enter your userid and password, you may be prompted to change your password. Once you’re logged in to the computer you can now logout, you’re done!

- On many mobile devices all you need to do now is scan for a wireless network, select “AirSuccess” and enter your network userid and password.

Some gaming devices that are not wireless enabled can be connected to the campus wired network, an authorization form is available from the Student Helpdesk located in room 8A of Harris Hall. After the Student Helpdesk receives your request a technician will be dispatched to activate a network port in your room and provide a network cable if needed.

Computers will not be activated for the wired network. If your computer doesn’t support wireless the VSU Bookstore, along with most electronic retailers off campus, carry wireless adapters that can be used to connect to AirSuccess.

In addition to residence halls, other wireless locations on campus are in Gateway Dining/Event Center, Reginald F. Lewis School of Business, and Johnston Memorial Library, with many more on the way.
